Health and Beauty

No undergarment in the world can create a lovely figure from a too heavy body. Not only is it important to stay slim for appearance's sake, but also for the sake of your health.

Doctors have gone on record as saying that a person is far better off being a little under-weight than over-weight. Unless there is a real physical reason for excess weight, there is no excuse for allowing oneself to become fat.

Some individuals have a mental complex which causes them to overeat. This complex can be controlled once it is understood. A sensible diet, coupled with the right amount of exercise, can well be called the basis of good health and good looks.

Unfortunately, there are endless fad diets in circulation. Don't try any of these.

When you have made up your mind that it is time for some weight, go to your doctor. He will give you a nation and prescribe the diet you need, and one that good for you.

Follow your doctor's advi the amount of weight to safe for young children a on a diet under a doctor tion. However, a child s er be put on a diet unless has examined him and the diet list.

NEW VEPCO RATES
for electric home heating and 24-hour water heating

NEW LOW HOME HEATING RATE

Starting this June, your present home or new home can have clean, safe, silent Electric Heating, or complete, all-year Electric Climate Control at a new low, low rate. After the first 600 kilowatt hours clocked by your regular meter, the new residential rate drops to only 1½c per kilowatt hour . . . which means that from then on you save 16c on every dollar! And the new rate includes other savings, too. Send for VEPCO'S free booklets: "Electricity, Your Better Way To Heat" and "Come On In, The Weather's Fine." And ask VEPCO to estimate the new low cost of enjoying the world's most modern heat, or all-year climate control in your home.

NEW LOW 24-HOUR HOME WATER HEATING RATE

Here's great news for modern families that like lots of piping hot water around the clock. Beginning with June, you can enjoy 24-hour water heating electricity in your home at a rate almost as low as present rates for time-controlled service. What's more, you can use the new, efficient quick-recovery tank. It's so compact, it tucks away anywhere . . . so fast it keeps up with load after load of automatic wash.

SMALLER BUT FASTER! VEPCO's new rate lets your home use the compact, quick-recovery Electric Water Heater at right. It's only about half the size of the big low power tank beside it. Yet its higher power heating unit gives you hot water far faster, keeps up with family baths, even on washday.

IF YOUR WATER HEATER'S ON A 2nd TIME-CONTROLLED METER, and you want more hot water . . . just tell VEPCO to switch your time-controlled meter to the new 24-hour service. The new rate for homes is only 2c per kilowatt hour for the first 100 kwh, then drops to 1c per kwh for all you use above that . . . our lowest round-the-clock residential rate.

IF YOU HEAT WATER FROM YOUR ONE REGULAR METER . . . You may save by switching to VEPCO'S new rate. Just tell your Electrical Contractor to put your Water Heater on a separate circuit, with a separate 24-hour service meter. After the first 100 kilowatt hours, you'll then pay only 1c per kilowatt hour . . . a real saving in cost.

IF YOU NOW HEAT WATER IN SOME LESS MODERN WAY, tell your Plumbing Contractor or Electric Appliance Dealer you want to change over to 100% clean, silent, safe, automatic Electricity. With our lowest 24-hour residential rate . . . and the new, compact, quick-recovery tanks . . . you'll find electricity can match pennies, and match speed with any water heating system.

ns Are Different

Christians have always been out-
ed in this world. Even in-
all the nominal Christians

nal Christian has been de-
one who goes to church,
precisely is dragged there,

Real Christians are so

as seen—are not Christian
A real Christian, in short
one who has a close re-
e to Jesus Christ, because
the mind of Christ and
Christ lives in him), will be marked
ff as peculiar.

Once there was a little boy in a
Russian village who was different
from all other little boys there, on
two counts. He wore glasses, and
he played the fiddle. (You were not
supposed to indulge in either of
these till you were old and grey.)
So all the other boys would make
fun by five hard, "Hit him!" they
would yell as a dozen or more piled
on him at once. "Hit him! He plays
the fiddle!"

This is not only a true story but
a picture of life in this world.
Fear and hate what is differ-
ent. Not all people show this hate
but not all feel it. But enough
of the people in Jerusalem hated
and feared Jesus, who was out-
wardly different from them, so
much that they could scream
"Crucify him!" Ever since then,
Christians have been unwelcome in
non-Christian society. "Woe unto
you when ALL men speak well of
you," Jesus said (Luke 6:26). If
everybody speaks well of you, it
may be you have no real character,
or you appeal to too many opposite
groups of people! Suppose our Lord
had tried to please every one?

Christians Are Welcome

All the same, and you can call it a
paradox if you like,—all the same,
Christians are welcome, even
welcome those who can't see their
way to follow Jesus called his fol-
lowers "salt" and "light." Salt and
light are penetrated by contact, and so
are Christians. Jesus assumed that
His people would make direct con-
tact with the human world around
them as he did. Now people
seem actively grateful either
for salt or light. But they gripe
when they are left in the dark, they
gripe when they have to eat
food without salt. Perhaps "Christ-
ian welcome" is saying it too
much. "Christians are needed"
may come closer to the bull's-eye.
Even without Christians may in-
deed fans, but who wants to
be one? No business firm is
going to send its best men to live
in the worst towns. Indeed no
parents want to send their children
to live in the least Christian
of town. Even people who
have taken the doors of a church
may not like to live where no
one is are.

A DOG'S LIFE

Chicago.– A manufacturer of drive in banking equipment reports that curb-side banking is going to the dogs.

Edwin H. Mosier, Jr., president of the firm, says it happens every day at the Alexandria National Bank, Alexandria, Va.

The bank passed out lollypops to children. A teller noticed the number of dogs who gazed longingly at the candy, even stealing an occasional lick. Now the bank provides puppy biscuits for dogs accompanying its drive-in customers.

WE SHARE...
KNOWLEDGE!

What makes a worm crawl might be the basis by which a small boy will seek to broaden his knowledge of things past, things present, and things to come. In many ways we all are like the small boy in that our curosity gives us the incentive to learn more about the things we see in our daily lives.

We spend our lives striving to increase our knowledge of science, agriculture, religion, history and other phases of life.

Great men the world over became great because they had a desire to learn about the simple things of life and the ability to relate their knowledge to others.

Human progress is made possible by our ability to share our talents and accomplishments. When we share knowledge, whether it be in education, business, pleasure or any other field, we share life itself.
